Setting Up Your Android Device
with your FIU PantherMail Email Account

Step 1: Enable IMAP on your PantherMail account

1. Point your browser to PantherMail at http://panthermail.fiu.edu and log in with your PantherMail username and password.
2. From the top right-hand corner, click on the gear icon and select Settings.
3. Select the Forwarding and POP/IMAP tab.
4. Scroll down to the IMAP Access section, and select Enable IMAP.
5. Click Save Changes.

Step 2: Setup Email account on your Android mobile phone

1. From your phone’s main menu, select the Email application.
2. When prompted, enter your PantherMail e-mail address and password.
4. Select IMAP.
5. At the Incoming Server Settings, enter the following:
   - For Username, enter your PantherMail username (with the @fiu.edu); e.g., jdoe001@fiu.edu
   - For Password, enter your PantherMail password.
   - For IMAP server, enter: imap.gmail.com
   - For Security Type, select SSL (Accept all certificates).
   - For Port, select 993.
6. Click Next.
7. At the Outgoing Server Settings screen, enter the following:
   - For Outgoing Mail/SMTP server, enter: smtp.gmail.com
   - For Security Type, select TLS (Accept all certificates).
   - For Port, enter: 587.
8. When prompted, set your account options (e.g., Name for the account, how often to fetch mail, etc.)
9. Click Done or Finish.
10. In a few minutes, your PantherMail e-mail will start synching.

Congratulations! You have successfully set up your Android to receive your PantherMail!
